An astronomy book lay propped open on the table in front of him. Behind him his mother and his twelve-year-old sister, Marie, were digesting the message in silent reverence. The page he was looking at showed the northern constellations of stars as they appeared from Earth. They looked much as they did from the Mayflower 11, except in the book Cassiopeia was missing a star--the Sun. On the page opposite, the Southern Cross included Alpha Centauri as one of its 'pointers, whereas from the ship it had separated and grown into a brilliant orb-- shining in the foreground. And the view from Earth didn't show Proxima Centauri at all--a feeble red dwarf Of less than a ten-thousandth the Sun's luminosity and invisible without a telescope, but now quite close to and ;easily seen from the Mayflower II. Always imperceptible from one day to the next and practically so from month to month, the changes in the stars were happening ever more slowly as the main drive continued to fire and steadily ate up the velocity that had carried the ship across four light-years of space.. "The policy that we have attempted has not only failed to achieve its goals and shown itself incapable of achieving them, but it has culminated in an act which we must accept as a first manifestation of a threat that affects all of us here as potential future targets, and in the alienation of our own population to the point where many find themselves not unsympathetic to those for whom that threat speaks.
