Apparently the leader of the west gate group, a Private Davis, had been told by Padawski that the west gate would be the rallying point for a rush to the motor pool. Either Davis had been set up to draw the hunt away deliberately or Padawski had changed his plans at the last minute. Nobody else had shown up at the west gate, and Davis's group had been left stranded. But only a few more were in the transporter when it landed, and Padawski was not among them. They claimed that after they had seized the aircraft, Padawski had radioed them to get away while they could because he was pinned down with the main party by the Omar Bradley Block. But Sirocco had had the Omar Bradley Block well covered and secured throughout, and nobody had been near it. And somewhere in the middle of it all, Padawski and twenty-three others, all heavily armed, had melted away. Driscoll straightened up from the wall and grinned, not knowing what else to do. "Well... hi," he returned. Sinsemilla had been struck mute by either the unexpected outcome or the spectacle. Colman had been intimately involved with the work on the new drive system as the engineering project leader of a team working under Bernard Fallows's direction. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Many of the faces from five years back were there too. Few of them had lost contact during that time, but it was rare for so many of them to be in the same place at the same time, except for their annual reunions. Most of the Company had assembled for the event-Sirocco, with Shirley and their twin daughters; Hanlon, who now instructed at the martial arts academy in Franklin, with Janet and their two children; Driscoll, who had taken a rest from his touring magic show, one of Chiron's major entertainment attractions; Stanislaw, now a computer software expert; Swyley, who directed and produced movies, usually about the American underworld, along with a couple of the pretty girls who seemed to surround him wherever he went; and there were others. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too. Jay, now twenty and with a young son, had built an old-fashioned railroad into Franklin-now a sizable and thriving city-which used full-scale steam loco. "When you've got enough to eat and drink, then you worry about keeping warm. And when you're warm enough, you start thinking about staying safe." Colman opened his hands briefly. "When a bunch of people live together, for most of the time most of the people get enough to drink and eat, and manage to keep warm and safe. What do you think they start worrying about then?" "This is private," he murmured in a voice that was low but menacing. "Beat it." "No roses." "The Army's on its way through the Spindle," Lesley said to Brad. "They should start arriving here any time now." "What alternative?" The sight of this shiny cudgel knocked fresh laughter out of Sinsemilla. She clapped her hands, oblivious. Richard Velnod couldn't free himself, but at least he could set loose mice and moths. Noah could free monkey might scamper, the boy turns a corner at a long butcher block and encounters a cook who's. "I didn't know you had a thing about little girls, Steve," Anita teased. "You don't look the type." Hanlon roared and slapped his thigh. The Assistant Deputy Director of Engineering at last sat back and descended from his loftier plane of thought. "Ah, yes, Fallows." He gestured toward the screen he had been studying. "What do you know about this man Colman who's trying to get himself out of the Army and into Engineering? The Deputy has received a copy of the transfer request filed with the Military and passed it along to me for comment. It seems that this Colman has given your name as a reference. What do you know about him?" The inclined chin and the narrowing of the Gothic eyebrows were asking silently why any self-respecting echelon-four engineering officer would associate with an infantry sergeant. Trapped in this claustrophobic rolling slaughterhouse with psychotic retirees who'll eat him with chips and had to do what needed to be done. Visiting from Beyond. Pale and willowy, the woman spun and swooned and jerked erect and spun again, in the memory of her love, her toughness, her steely resolution. His wretched sobbing subsided. The kitchen had seemed quiet before, but the fridge had been making more noise than Micky realized. Spiky hair in the passenger's seat? Stare back at him with the lidless eyes and the puckered mouths. Besides, there's no time to pick and choose. As those SWAT agents help their more conventional. "Where to?" Colman asked her. "So what about the nuts?" Jay asked. "What do you do about people who insist on being as unreasonable and oh= noxious as they can, just for the hell of it?" Donella appears to be arguing with Mr. Hooper, probably trying to get him to shut his trap, but poor time is his ally. The longer he eludes that savage crew, the fainter his trail becomes or at least this is. Although she could let go of the broken serpent and use the pivoting trick with her braced leg to turn her. "First, let's recap the main points. The primary object is to get into the Communications Center and secure it while the transmission goes out, and after that to hold it and hope that enough of the Army reacts quickly enough to take the pressure off, Okay?" There were no questions, so Sirocco continued. "The big risk is that SD reinforcements will be brought up from the surface, if that happens, they'll have." True, but if we can get past this one, we might be able to clear out those ports from behind and at least make this place safer for bringing up heavy stuff to take out the second one. She quieted the cynic in him, and he liked this inner hush, which he hadn't known for many years. Now, if he can find a toilet, all will be right with the world. "But the rules are so dumb," lay protested. "They don't make sense. Why is somebody any better because of what it says on the outside of his office? It's what he does inside that matters." To dart beneath the surface of their conversation, though it eluded her net. Reborn, the frightened fugitive scampered directly to him, onto his palm, up his arm, finally to a stop on his. He grabs the handle on a container of orange juice, making a mental note to return to Utah. "For now," Stern added. "The rest comes later." Tail wagging, the pooch pads into the bathroom? and straight toward the toilet cubicle.. shallow closet. It's apparently packed as full and chaotically as a maniac's mind, and as he senses and. Re turned back, shaking his head despairingly, and looked at Kath again. Now that Swyley had moved from the bar, her party manner had given way to something more intimate. Colman held her gaze as her gray-green eyes flickered over his face, calmly but searching, as if she were probing the thoughts within. He became acutely aware of the firm, rounded body beneath her clinging pink dress, of the hint of fragrance in her soft, tumbling hair, and the smoothness of the skin on her tanned, shapely arms. Deep down he had seen this coming all through the evening, but only now was he prepared to accept it consciously. All the reassurance he needed shone from her eyes, but the conditioning of a lifetime had erected a barrier that he was unable to break down. For a few seconds that seemed to last forever he felt as if he was in one of those dreams where he knew what he wanted to say and do, but his mouth and body were paralyzed. He knew it was a reflex triggered by ingrained habits of thought, but at the same time he was powerless to overcome it. "I'm not sure," Kalens replied distantly. Trying to elucidate Stern's motives is akin to peeling an onion. But when you think it through, if there's no resistance, we win automatically, and if there is, then the Chironians will be forced to make the first moves, which gives us both a free hand to respond and a clear-cut justification that will satisfy our own people. . . . which' is doubly important with the elections coming up. So really you have to agree, John, the scheme does have considerable merit. "It wouldn't have worked," Wellesley countered. "We'd simply have remained shut up behind a fence, ignored, and looking

ridiculous." barefoot in the crisp dead grass..It was the right thing to do. She collected her wits quickly, shouldered the roll at an angle across the back of her neck, and followed him into the lounge. Colman went ahead to stand peering through tile doorway from one side while soldiers came and went in bewildering confusion and then he motioned her out suddenly. In a strangely dreamlike way she found herself being conveyed down. the stairway between two soldiers who were keeping up a steady exchange about something not being large enough and a typical screw-up somewhere, and then she was outside and crossing the rear parking area toward a personnel carrier standing a short distance back behind some other vehicles. Suddenly, without really remembering getting in, she was sitting in the cabin, ~figures materialized swiftly and silently from the darkness and jumped in after her. The last of them closed the door, the engine started, and she felt herself being lifted. Only then did she start shaking..Hoover must be throwing fits somewhere in the night nearby, struggling to work up enough ectoplasm to..Leilani opened the door to her room and switched on the light. It's what I was told happened to Luki."..His dark-adapted eyes sting briefly from the glare.."Number One Forward Port has surrendered," Oorsden said tightly, taking in another report. "The firing has stopped there. Nickolson is leading his men out, including his reserve. We have no choice.".."When I went to Port Norday with Jay, I found out that they're planning a new complex farther north. They're going to need engineers-fusion engineers. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it-our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that.." His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest.."Yes--some kind of industrial complex, wasn't it?" "It's a centralized, fusion-based facility, that provides gen-..She hadn't cried since childhood. She'd thought that she was beyond tears, too tough for self-pity and..to be entrusted to the masses. It should be controlled by those who have the intelligence to apply it competently and beneficially. Gaultz would be a suitable figure to groom as a... high priest, don't you think, to restore some healthy awe and mystery to the subject. He nodded knowingly. "The Ancient Egyptians had the fight idea." As he spoke, it occurred to him that the Pyramids could be taken as symbolizing the hierarchical form of an ideal, stable society-a geometric iceberg. The analogy was an interesting one. It would make a good point to bring up at the dinner party. Perhaps he would adopt it as an emblem of the regime to be established on Chiron..He's scared, mouth suddenly bitter with the taste of what might be his mortality, lungs cinched tight..remorse, even though she'd been motivated by genuine concern.
