And none of it was going to change--ever. Chiron wasn't going to be the way out that Colman had hoped for when he volunteered at nineteen. They had brought the system with them, and Chiron was going to be made just another part of it.."Child Protective Services?". "I didn't know you had a thing about little girls, Steve," Anita teased. "You don't look the type." Hanlon roared and slapped his thigh.."Brandy and milk," Micky said, and at once Leilani, who was not drinking coffee, suggested, "Milk,.".Carson frowned and thought about the implications, then shook his head. "It's impossible," he said. "No system could work like that..To preserve the essential characteristics of the American System, life aboard the Mayflower I1 was' organized under a civilian administration to which both the regular military command and the military-style crew organization were subordinated. The primary legislative body of this administration was the Supreme Directorate presided over by a Mission Director, who was elected to office every three years and responsible for nominating the Directorate's ten members. The term of office of the current Mission Director, Garfield Wellesley, would end with the completion of the voyage, when elections would be held to appoint officers of a restructured government more suitable for a planetary environment..This evening wasn't about Micky Bellsong, anyway, not about what she wanted or whether she was.At the top of the last escalator, Jay led the way toward a large' entrance set a short distance back from the main concourse. Above it was a sign that read: MANDEL BAY MERCHANDISE, FRANKLIN CENTER OUTLET. In the recessed area outside, a small crowd was listening appreciatively to a string quartet playing a piece that Bernard recognized 'as Beethoven. Suddenly, for a moment, Earth seemed less far away. Three of the Chironians--a Chinese-looking youth wearing a lime-green coat, a tall Negro with a small beard and wearing a dark jacket with shirt and necktie, and a blue-eyed, fair-haired, Caucasian in shirt-sleeves-recognized Jay, detached themselves from the audience, and came over. Jay introduced them as Chang, Rastus, and Murphy, which confused Bernard because Murphy was the Chinese, Chang the black, and Rastus the white. Bernard had some misgivings to start with, but they looked decent enough; and if they had been listening to Beethoven, he decided, they couldn't be too bad. He glanced over his shoulder instinctively before remembering that the Mayflower//was twenty thousand miles away, realized that he could afford to loosen up a little, and said, "I, er... Micky.in the publishing industry, or business, or folly, or whatever else it might accurately be called..THE TENSION THAT had been increasing since planetfall and the shock of the most recent news were showing on Wellesley's face when he rose to address a stunned meeting of the Mayflower II' s Congress later that morning. And as he seemed a shell of the man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. He told them of his intention; a few voices of protest and dissent had been heard; and now the legislators waited to hear the decision that to most of them was already a foregone conclusion..Humor is emotional chaos remembered in tranquility. ?James Thurber.true, all right..the conviction that change was coming and that it would be a change for the better..Merrick drew a long breath, and his expression became grave. "Mmm Walters. That brings me to the other thing I have to tell you," he said in a heavy voice. "Officer Walters is no longer with us. He and his family disappeared from Cordova Village two days ago and have not been 'heard of since. He failed to report for duty yesterday. We must assume that he has absconded. Michelina Birdsong..".of the battle zone..Otto smiled humorlessly. "Take a look at the other lunatics around you," he suggested. "What happened to all the people? Where did your army go? They're all Chironians now. And you have nothing to offer them but protection from the fear that you would

manufacture in their minds. But they have Chironian minds. They see that the fear is your fear, not theirs; and it is you who are in need of protection, not they." Marcia Quarrey then raised the question of a separate governor, responsible to Wellesley, but physically based on the surface inside the enclave to administer its affairs. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles away in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Stern for the new office. Stern, however, declined on the grounds that a large part of the job would involve policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, he therefore nominated Howard Kalens; Quarrey seconded, and the vote was carried by a wide margin. . . . different, and he travels under the name Jordan? call me Jorry? Banks. If you use his real name, he'll. Colman shrugged. "Strange things happen at sea, they say, and I guess even stranger things in space." "I agree, I agree," Lechat told them. "But we only know what we know, and we can only do what we can do. Surely doing so is not going to make things any worse. Will you try it?" Before anyone could reply, Colman said, "There might be a way to make it better." Everyone looked at him. He swept his hands around quickly. "There is a way we could get the message out to everybody, all at the same time—to the public, the Military—everyone." He looked around again. The others waited. "Through the Communications Center up in the ship," he said. "Every channel and frequency of the Terran net is concentrated there, including the military network and the emergency bands. We could broadcast from there on all of them simultaneously. You couldn't make much more impact than that." He sat back and looked around again to invite reactions. . . . Jean shook her head in protest. "But you can't . . . I won't go. I want to move to Iberia." Jay shook his head. "It'd just mean we've got the same problem. It wouldn't solve anything." . . . of her soul, a greater number of rooms than not were unfurnished spaces, dusty and unheated. Since . . . step too far. I don't buy the alien abduction for a second." . . . house, onto the front-porch roof, and glances back. . . . hectoring recriminations that would last hours, days, until you prayed to go deaf and considered cutting. Bernard decided to play along to see what happened. "I'm sorry—how do you mean, last time? I must be missing something." . . . is a concentration of energy—energy density—like at the tip of a match. Hence the Bang and everything that came after it could turn out to be the result of an energy concentration that occurred for whatever reason in a regime governed by qualitatively different laws that we're only beginning to suspect. And that's what my line of research is concerned with." . . . dissolved into weeping? not the genteel tears of a melancholy maiden, but wretched racking sobs. "Will the Chironians let him wait that long?" Colman asked. "Do they know he's in there and what it means?" . . . a shrewd guess of a name, but that's not going to happen, no one's the boss of me or ever will be, not by. Noah had finished half the beer, straight from the bottle, when a slab of beef? marinated in hair oil and . . . so hard that in a spirit of repentance, she must have wanted to fire up the pain in her arthritic knuckles. . . . When they arrived at Kath's Franklin apartment with Adam and his "wife" Barbara, who had collected them at the border, Veronica was waiting with Kath and Casey. Colman already knew everybody, and while he and Kath were introducing Bernard and Lechat to those they hadn't met previously, Veronica and Celia greeted each other with hugs and a few more tears from Celia. . . . Lechat's brows lifted and then creased into an even deeper frown. "And then there were those bombings. . . . He looked down at Celia. "Was Stern behind those things as well?" "He wouldn't get away with it, surely," Jay said incredulously. "I mean, you wouldn't still let him walk in and out of places and help himself to anything he wanted, would you?" . . . Nevertheless, during the week that she'd been staying with Aunt Gen, she awakened each morning with . . . boy hears voices. Men in easy conversation. . . . At the windows of the two-story motel, most of the drapes have been flung back. Curious, worried. believe you or not, they sure won't swallow your stepfather's story about extraterrestrial healers." . . . At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a . . . couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station—he was getting used to that by now—but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence. . . . we're proud of them." . . . been in years. . . . entirely sure what she was doing or why she was doing it. In that more common condition, Laura now. Movement to Noah's left drew his attention. A few feet away, another demolition expert swung a. "Ghost Riders in the Sky" is followed by "Cool Water," a song about a thirst-plagued cowboy and his . . . guy who robbed your store?" "It is. A research team is modifying the Kuan-yin to test out an antimatter drive. In fact the project is at quite an advanced stage. They're doing the same kind of thing back on Earth, aren't they?" . . . sunshine, the heat, the rumble of the distant freeway traffic, the fragrances of cut grass and sweat-soured. . . . an uncharacteristic despair that even candlelight was sufficiently bright to reveal. . . . "They do. How could it be up to anyone else?" . . . down. In this girl, Micky saw the hope of a good, clean life full of purpose? which she couldn't quite yet. Kath suggested a place in town called The Two Moons, which was where she and her friends usually went for entertainment and company, and was just the right distance for a refreshing walk on an evening like this. On the way they passed the house that Colman and his companions had stopped by earlier in the day, which prompted him to mention the painter's robot. "It looked as if it was learning the trade," Colman said.
